

This comment is in reference to LPFM. I understand this may take priority over FM signals and I may lose my local station 91.3 in San Antonio which is a Christian radio station. If this station were displaced, that would leave San Antonio without a contemporary Christian station. This music serves the community in many ways. Not only through music, but by teaching positive principles, and sharing community events that are going on. Please do not let LPFM take over my local stations.
